

12 Position Wilson Wah
Thank you for purchasing a Wilson Effect's 12 Position Wilson Wah. The pedal is modeled after a vintage wah circuit. The base circuit has been tweaked a bit to my specs in order to fatten the sound and give you a little bit of a different growl characteristic. So whether you enjoy a fat classic wah sound or you like a more modern throaty wah sound the 12 Position Wilson Wah is sure to deliver.

Layout and overview of the 12 Position Wilson Wah

- A) Growl:** Controls the amount of bass and gain introduced into the signal. This biases a transistor to ground and will make a scratching sound when turned. It is also possible for it to oscillate slightly in the heel position.
- B) Guitar Input**
- C) “Q” Selector Switch:** This allows the user to adjust the “Q” position of the pedal, allowing you to dial in various sounds. Turning it towards the front darkens the tone and turning it towards the heel brightens the tone.
- D) Depth:** This knob allows you to adjust the depth or width of the sweep. Turning it towards the front of the pedal will give the user the full range of the pedal. Dialing the knob back will shorten the sweep range and depth of the effect.
- E) LED on/off Indicator:** This light will only come on when the pedal is engaged.
- F) Output to Amplifier**
- G) DC Power Jack:** Use only a 2.1mm center negative regulated power supply of 9vdc.
- H) Inside the pedal there are 2 trimmers. One for mid-range and one for volume. Feel free to adjust these to your liking.**

Either a 9v high quality alkaline battery or a 2.1mm center negative power supply and cable can power your new 12 Position Wilson Wah. When operating the pedal via battery you should unplug the pedal when not in use to insure the longest battery life. Try to keep your pedal as far away from your power supply as possible to minimize interference. Use high quality electronics grade cleaners and lubricants for the occasional cleaning of wah pedal components. If you have any other questions or concerns please visit the FAQ page at www.wilsoneffects.com or email me at wilsoneffects@wilsoneffects.com. Your new pedal is covered by a one-year warranty on parts and labor. This warranty excludes friction-based components such as potentiometers and switches.
